

MDP Melbourne Environmental Policy

Origin Major Development Projects (MDP) Melbourne is focussed on wind farm development and is committed to realising renewable energy projects through sustainable practices. MDP Melbourne aims to provide leadership in managing the impacts of our activities and will continually strive to set an example of best practice environmental management. MDP Melbourne recognises the value of the environment to the community and future generations.

MDP Melbourne is continually committed to:-

- Identifying all environmental aspects and impacts of our operations through regular reviewing and internal auditing;
- Continual improvement in environmental management practices and performance;
- Communicating openly and transparently with appropriate parties on environmental matters;
- Managing land under our care with sensitivity, having due regard for local environment and cultural sensitivities;
- The use of the latest or most appropriate technology in order to maximise power output whilst having due consideration for the environmental impact of our activities, products and services;
- Complying with all environmental legislation and other requirements which relate to its environmental aspects, including the Auswind Best Practice Guidelines;
- Educating employees and contractors (any persons performing a task for the organisation or on its behalf) to conduct their activities in an environmentally responsible manner;
- Ensuring this policy is readily available to the public, maintained and communicated to all persons working for or on behalf of this organisation, and is periodically reviewed;
- Continuing to refine and continually improve our Environmental Policy and environmental objectives and targets.

The *MDP Melbourne* Environmental Management System provides the framework for developing, implementing, monitoring and reviewing environmental objectives, actions and targets as set out in our environmental plans. These objectives and targets drive our management programs and focus our commitment to continual improvement in environmental performance, as measured by our internal audits along with our environmental objectives and targets.
