

CONSTRUCTION UPDATE

STOCKYARD HILL
Wind Farm

#09 – June 22, 2018

With construction formally commencing on the 530-megawatt (MW) Stockyard Hill Wind Farm following satisfaction of the pre-construction conditions of the planning and environmental approvals recently.

Works have commenced on upgrading the local public road network that the construction traffic is able to use, this includes the following:

- Dunnets Road – construction of an additional laneway for construction traffic
- The redevelopment of the intersection of Skipton Road and Dunnets Road
- The redevelopment of Thompsons Road which will commence the week commencing 25 June.

There will be a noticeable increase in construction traffic and interruptions to traffic in the coming weeks due to upgrades of these roads. Please take care and observe warning and speed restriction signs. The Stockyard Hill Wind Farm team aim to keep local disruption to a minimum and apologises if construction activities cause you some inconvenience.

Works will continue to be focussed on the central/western area of the wind farm (accessed off Stockyard Hill Road near Stockyard-Hill Wangatta Road) with the quarry operations, establishment of the construction compounds and initial access road construction. Quarry works approved under the Mineral Resource Sustainability and Development Act (MRSDA) Act under Work Plan WA1518, will result in Stockyard Hill-Wangatta Road having restricted access on Monday 25 June 2018, between 12:30pm to 2:30pm.

Works will also commence on the southern section of the wind farm (Mt Emu Settlement Road). Quarry materials will be trucked in from the quarry south of Skipton for the construction of this area of the wind farm.
